From email:

"I wanted to make you aware of a snowmobile triggered slide in Lionhead today. Fortunately, I was not injured, was able to stay completely on top, climbed through the majority of the snow wash after seeing it begin to break, and relatively slowly slid down with the last of the moving snow while still on the machine. When I came to a stop, I stood up and was completely free of the snow. Our group is trained in avalanche safety, practiced beacon

use prior to leaving town in the morning, were wearing avy gear, and were very fortunate that this ended up the way it did.

A clear reminder that this can happen to any of us and to be careful out there."
