

Natural avalanches in new snow in Bridgers

The Throne
Bridger Range
3/25/2020
Code
SS-N
Latitude
45.88220
Longitude
-110.95200
Notes

From obs: "We toured up in the Throne area today. Moderate winds were blowing snow at mid elevations and ridgetops. We found dry boot top powder on East facing slopes, the snow skied upside down. We observed loose and [slab](#) avalanches on many aspects up high and at mid elevations, all looked like new snow avalanches that happened yesterday. I've attached a photo of an east facing slope near the Throne." Photo: S. Jonas
