

HS:125 **Layer Notes:**
22-0cm: Problematic layer

specimens.

The figure displays a Snow Pilot profile plot. The vertical axis represents height in centimeters, ranging from 0 to 125. The horizontal axis shows snow layers labeled I, K, P, 1F, 4F, and F. A blue shaded area indicates the snow profile. Key features include a thin layer at ~98cm (ECTN16) and another at ~94cm (ECTN29). To the right, a table summarizes the data:

Form	Crystal Size	Moisture	ρ kg/m ³	Stability tests & Layer
(○)				ECTN16 @98cm
(○)				ECTN29 @94cm
□	1			
□	1			
⊗(□)	(2)			
□	2-3
