

Collapsing on Ernie Miller Ridge

Ernie Miller Ridge

Southern Madison

12/3/2022

Code

AS

Elevation

9300

Aspect

E

Latitude

44.94530

Longitude

-111.13500

Notes

"We toured to Ernie Miller today and saw a natural avalanche on a NE slope around 9600 ft. We heard and felt multiple collapses on our way in. We dug a pit on an east facing slope around 9300 ft where we found 105 cm of snow. We got a ECTN 2 result, failing on an interface about 15cm from the surface and ECTP5 failing 40 cm from the surface."

"Toured up to Bacon Rind today and skied meadows off of the ridge. Noted many collapses and whumpfs in the snowpack as we ascended east aspects to the ridge."
