

West side bridgers

Date

Fri, 12/30/2022 - 01:30

Activity

Skiing

Went to jones creek yesterday, 20 cm facets underneath everything it seems. Depth where the wind could reach it(sw aspects mostly) was averaging 60 cm, 100 to 120 cm where it was more protected. Not a lot of weight yet but columns failed on isolation. No cracking or whumphing

Region

Bridger Range

Location (from list)

Truman Gulch

Observer Name

Pat Hinz
