

Wet Loose in Beehive Basin

Date

Sat, 01/20/2024 - 14:15

Activity

Skiing

While skiing into Beehive Basin from the ridge between Beehive and Middle basin we noticed some sizable natural wet loose avalanches. West facing, around 9000 feet, 10-12 inches deep, ran ~150 feet, observed at 2:15 pm. The new snow from last weeks storm had warmed and slid on the weak snow below.

Region

Northern Madison

Location (from list)

Beehive Basin

Observer Name

Spencer L
