Notes

From obs: "Still experiencing whumphing, and cracking along the skin [track](#). Tracks from 24 hrs ago had filled in from wind. Wind today was 3-6 mph at 8900'. HS at 8900', exposed ridge = 30" deep. We saw 2 slides a couple days old? One was either natural or possibly remotely triggered by skiers this weekend (photo attached). SE [aspect](#), about 9000' elev. "
