

# **Beehive Basin Persistent Layer Observed in CT**

Date

Thu, 02/08/2024 - 05:05

Activity

Skiing

Cracking about 20ft long observed during our tour when crossing over a gully/stream at 35 degree slope angle. Crust about 25-30 centimeters below soft snow showed instability along with the faceted base toward the bottom of the snowpack.

Region

Northern Madison

Location (from list)

Beehive Basin

Observer Name

John Emmett; Jamie McCready
