

Wind Slab avalanches in Frazier Basin

Date

Wed, 03/27/2024 - 10:05

Activity

Skiing

From IG: Very touchy on Hollywood wall this morning. All slopes easily propagated 4-6" deep on a firm [bed surface](#). Most were less than 50' wide with the exception of the [slide](#) in the [couloir](#) which propagated down the entire [couloir](#), maybe 500' wide, and ran through the exits into the main bowl.

Region

Bridger Range

Location (from list)

Frazier Basin

Observer Name

Max Cohen
