

Mt. Ellis update

Date

Fri, 01/17/2025 - 04:05

Activity

Skiing

Additional information for my mt ellis post, 1/17/2025. My description of the pit snow profile left out the bottom 15-20 cms which was the ever present sw montana faceted snow. It did show signs of healing.

Region

Northern Gallatin

Location (from list)

Mt Ellis

Observer Name

Dave Combs
