

Wind slabs in the Bridgers

Date

Sat, 02/22/2025 - 17:30

Activity

Skiing

Saw a recent cornice triggered wind slab off of Hardscrabble Peak, crown looked fairly fresh. There was a second crown line below the rock band. Conditions were very windy, with snow still being transported. Most snow surfaces were wind affected, but saw no cracking or collapsing.

Region

Bridger Range

Location (from list)

Hardscrabble Peak

Observer Name

Florence Miller
