

Fairly fresh avalanche up Hyalite

Date

Sun, 03/02/2025 - 11:05

Activity

Skiing

Saw a fairly fresh avalanche up Hyalite from the top of the Fat and Skinny Maids, I think that would put the avalanche in the Storm Castle Creek basin. North facing shady aspects were still cool and chalky, solar aspects were getting quite warm.

Region

Northern Gallatin

Location (from list)

Hyalite - main fork

Observer Name

Florence Miller
