

Cracking in wind drifted snow

Date

Tue, 03/18/2025 - 16:55

Activity

Skiing

Toured into Frazier basin today. Saw cracking in wind drifted snow near a ridge top at 8500'. The cracks were about 15 ft across. The drifted snow was about 1-1.5ft thick and still pretty soft. New snow depths varied, some areas were completely scoured.

Region

Bridger Range

Location (from list)

Frazier Basin

Observer Name

Jay Alford
