

Large recent wet loose avalanches at Bridger

Bridger Bowl
Bridger Range
5/1/2025
Code
WL-N-R2-D2
Elevation
8000
Aspect
E
Latitude
45.80840
Longitude
-110.93000
Notes

From obs.: "Saw many recent looking wet loose avalanches on east facing slopes at Bridger. We got a good look at the debris pile from one in Z chute and it looked big enough to bury a person (D2) and had run far past the cat [track](#) into south bowl.

We encountered a lot of variation in ski penetration with ~1' of loose melt forms in places on north and east facing slopes ~8k' in elevation."
