

Snow Pit Profile
Goose Creek
Beartooth, MT
Elevation (ft) **9567**
Aspect: **340**
Specifics:

Observer: **Mark Staples**
Tue Dec 17 12:45:00 MST 2013
Co-ord: **45.08220 N 109.94079 W**
Slope: **26**
Wind loading: **no**

Stability on similar slopes:
Air Temperature: **C**
Sky Cover:
Precipitation:
Wind: **Calm**

Stability Test Notes:
103: popped out
Layer note:
103-104: F

Notes: See pit from 11-27 in this area at: http://www.mtavalanche.com/images/13/goose-creek-pit?size=_original We found surface hoar on Henderson Died. It was at the exact same location. HS there was 165cm and stability test result was ECTP17/13. All other layers in this pit felt solid and it was easy to miss the surface hoar without a stability test.

Advisory Region
Cooke City
